🐱 PERSONAL PROJECTS

DevKt

<https://github.com/ice1000/dev-kt>

Cross-platform lightweight code editor / Kotlin IDE.

- Built-in Java/Kotlin highlights and completion, other languages can be supported via plugins (transplantable from JetBrains IDE's). Has extra build & run support for Kotlin.
- Flexible architecture, decoupled high-level logic with UI, migration to other UI frameworks is easy.
- Provides fine-grained highlight color and keymap settings, support hot reload.

Lice language

<https://github.com/lice-lang/lice>

Scalable programming language running on JVM.

- Supports lambda with and lazy (call by need) / macro (call by name) / strict (call by value).
- About 1/20 of Java's (Hotspot 8u151) performance, provides Java interaction and script engine support.
- Provides CLI REPL with GHCi-style code completion/colored output and JetBrains IDE plugin supporting semantic-based highlights, completion, go-to-definition, rename, eval-and-replace, quick fixes, etc.

Julia-IntelliJ

<https://github.com/ice1000/julia-intellij>

Julia plugin for JetBrains IDE, compatible with all JetBrains products.

- Semantic-based highlights, quick fixes, completion, special input mode for Unicode characters.
- Visual package manager and integration with Markdown plugin (highlight doc strings).
